

Zoom

We are utilising Zoom video communications as an extension of our online learning. Zoom video communication provides remote conferencing services that combines video conferencing, online meetings, chat, and mobile collaboration. Similar to skype and facetime, its main function is live video chatting. This can be done on any device which has a camera, microphone and internet connection. It will provide us with the functionality to communicate with the class together, using a video conferencing format.

Using the software

Teachers will notify students of any video conferencing sessions (lessons) through the Seesaw app. This will include the date, time, meeting ID and a brief description of the lesson. Sessions will require solo interaction with the camera and microphone, as to not disrupt any learning or concepts being taught.

Please be aware, once you have joined the meeting/lesson. Your camera and microphone will be live. We advise children to be set up in a well-lit, quiet room with sufficient preparation being taken. Bathroom break before start time, no food or drink, device sufficiently charged/charging, books and resources ready (pencil case, ruler, calculator).

Download and setting up on iPad or Tablet

- 1) Open the app store on your device
- 2) Search for Zoom (Zoom Cloud Meetings)

3) Once you have downloaded the app, open it up

4) You don't need to sign up or login

5) Select join a meeting

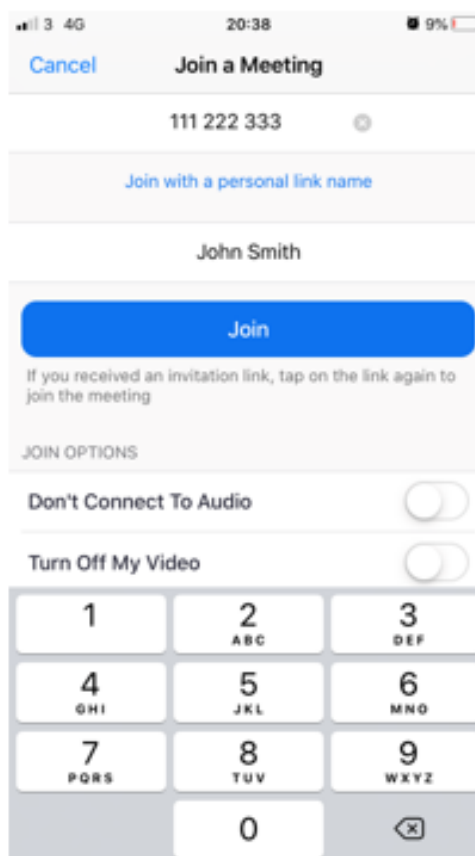

6) The app will bring you to this page

7) Enter the personalised meeting ID Ex. 111-222-333

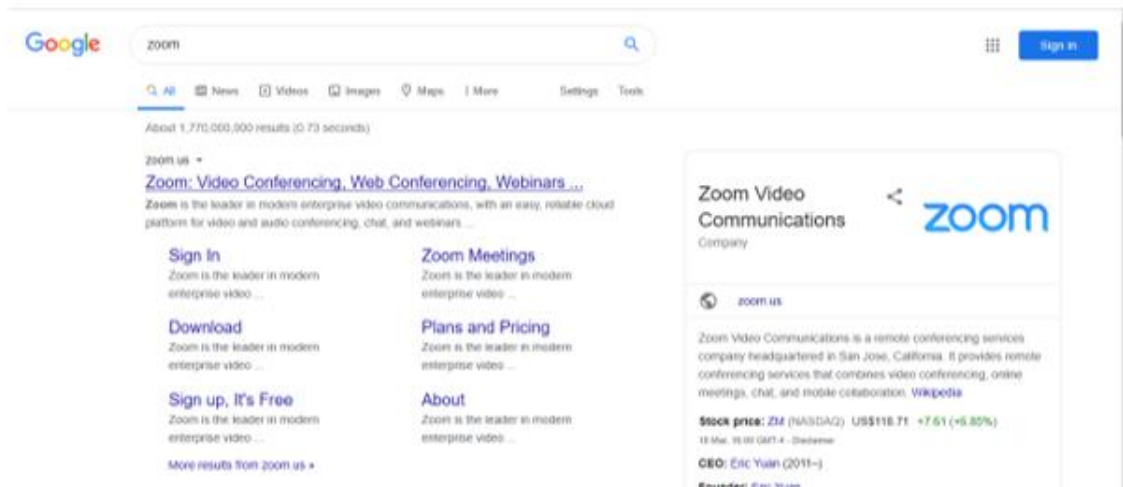

8) Children can enter their first name

9) When ready select join, this will bring you to the meeting

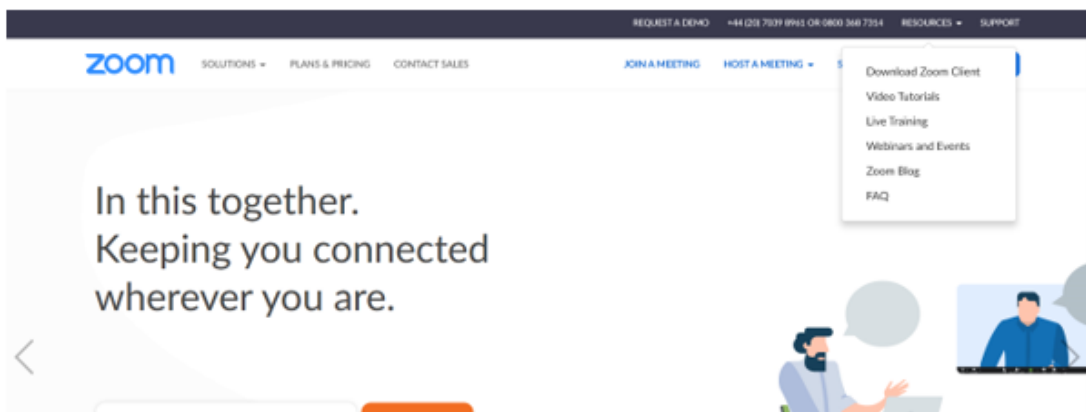

Download and setting up Web browser Zoom Application

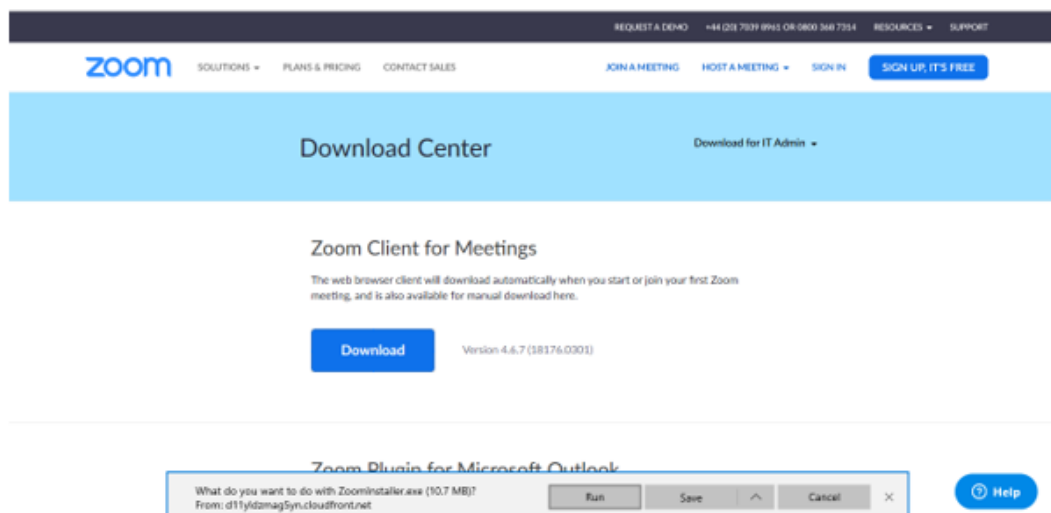

- 1) In your web browser or internet explorer, search 'Zoom'
- 2) Select the website shown below (should be the first one)

- 3) On the home page, go to the **resources** tab and select **Download Zoom Client**

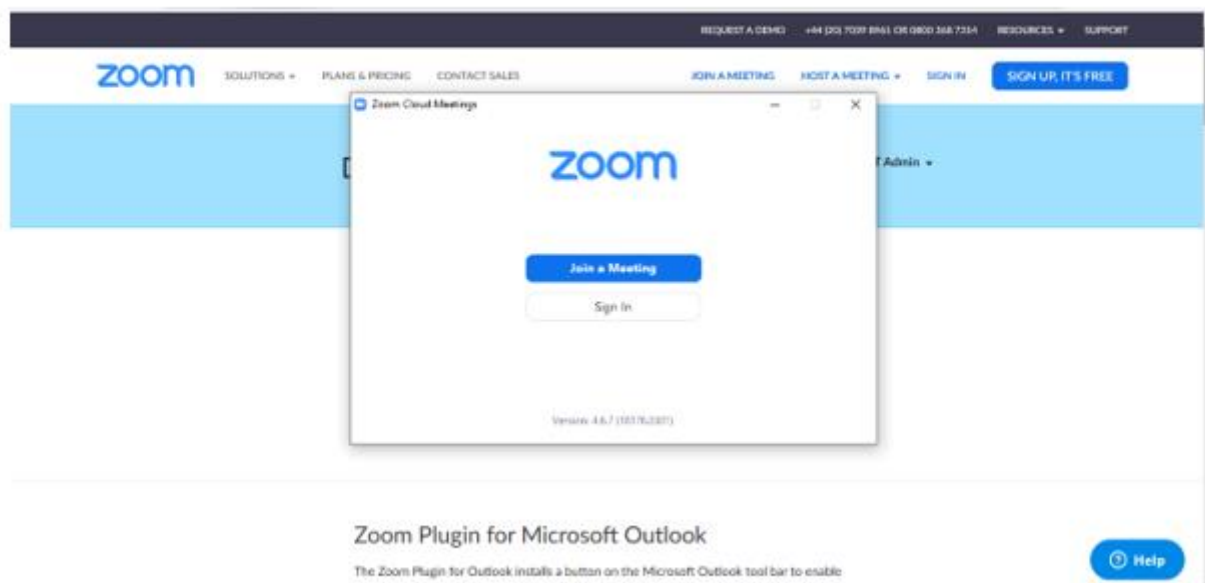

- 4) On the download centre select 'Zoom client for meetings' **Download** button, then select **Run** (ZoomInstaller)
- 5) You may be prompted, asking if the program can make changes to the computer. Select yes to install.

6) After it has installed, this window should appear

7) Select **join a meeting**

8) Enter your personalised meeting ID and the child's first name

9) Select **Join**. Remember once you select join, your video and audio will be live to other users
